Examiner's Comment

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on April 29, 2004 has been entered.

2. Applicant's information disclosure statements filed December 22, 2003 and April 29, 2004 have been considered. Please note that the information disclosure statement filed June 26, 2002 has been modified, a copy of which is attached. References AP-AY have been considered but are not in conformance since they are patent applications.

3. In view of the papers filed December 30, 2003, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of William D. Huse, Jeffrey D. Watkins and Herren Wu.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.

Art Unit: 1648

4. For clarification purposes, in the examiner's amendment mailed January 29, 2001, "replacement" claims 112-117, 133-138, 166-171 and 178-180 should have been referred to as "amended" claims 112-117, 133-138, 166-171 and 178-180.

5. For clarification of claim language, the phrase "domain having an amino acid sequence of SEQ ID NO: 11", for example in claim 96, has been interpreted as "domain comprising amino acid sequence SEQ ID NO: 11". The claim language "domain having an amino acid sequence of SEQ ID NO: 11" is not to be interpreted as a domain having a segment of SEQ ID NO: 11. The domain may contain other amino acids, but must have at least SEQ ID NO: 11 in its entirety. This interpretation applies to all instances in all the instant claims having the language described above.

Conclusion

6. Claims 96-98, 101, 102, 104-160 and 165-182 are allowable.
